 Codeforces  LeetCode

PROFILE

Motivated Software Engineering student and A2SV trainee with hands-on experience in full-stack web development using React, Next.js, TypeScript, and Python. Skilled in building responsive, secure, and user-friendly applications. Experienced in authentication systems, UI design, and team collaboration through real-world projects. Passionate about leveraging technology to solve community challenges and create meaningful social impact.

EDUCATION

Bachelor of Science in Software Engineering

02/2023 – 07/2028

Adama Science and Technology University 

- CGPA -- 3.77/4 
- Studied core engineering and algorithm design with hands-on assignments in data structures, embedded systems, and computational complexity.
- Relevant Coursework : **Data Structures and Algorithms, Web development, Database Systems.**

Data Structures and Algorithms, and Software Development

22/2025

Africa to Silicon Valley 

- A2SV (backed by **Google**) is a non-profit tech academy and incubator, and has trained **800+** software developers, **50+** of whom are offered full-time and internship opportunities at top-tech companies such as Google, Amazon, LinkedIn, Bloomberg and Databricks in the last four years.

PROFESSIONAL EXPERIENCE

Web Developer Intern

African to Silicon Vally

- Built and integrated authentication using OAuth 2.0, JWT, and NextAuth in a Next.js environment, improving user security and session reliability.
- Improved UI/UX by integrating CSS animations and Shadcn components, resulting in a 10% decrease in bounce rate and enhanced user engagement.
- Designed and executed end-to-end, component, and unit tests to ensure high code reliability and maintainability — using Cypress and Jest to achieving 99.9% code coverage, while efficiently managing project tasks via Jira and Git.

Members

03/2023

CSEC-ASTU

- Actively engaged in coding sessions, Algorithmic Thinking, workshops, and collaborative projects within the club.

PROJECTS

RemedyMate (AI-Powered Health Advisor) | TypeScript, React, Next.js, Python, TailwindCSS

- Deployed an AI chatbot using Next.js & Python that recommends natural remedies and OTC options; incorporated Ethiopian herb database and decision-making logic.
- Added Amharic support and an offline mode targeting rural users; prototype reached 10,000+ installs during testing.
- Built a functional prototype in **3 weeks**, demonstrating strong Debugging and Troubleshooting and fast execution.
- Developed severity detection logic that helped reduce **misdiagnosis risk by 20%** during trials.
- Executed an AI chatbot that provided **instant health advice to 500+ users** during prototype testing.

A2SV Application Platform (MVP) | React.js, Next.js, TailwindCSS

- Created and implemented the front-end for an application platform, enabling 200+ applicants to submit applications and 10+ reviewers to evaluate them efficiently during beta testing.
- Implemented reviewer workflows (assigned applications, detailed views, evaluation forms) based on PRD and Figma designs.
- Collaborated with backend developers to integrate **5+ APIs**, ensuring real-time submission tracking..
- Designed application workflows that improved review speed by **30%** through streamlined dashboards.
- Engineered a responsive UI (mobile-first design) achieving full compatibility across device sizes (100% mobile coverage).

TECHNICAL SKILLS

Frameworks & Libraries: React, Next.js, TailwindCSS, Java Swing, AWT

Programming languages: TypeScript, Java, Python, C++, SQL, HTML, CSS

Tools: Git, Postman, VS Code, Figma

Databases: SQL Server, MongoDB

AWARDS AND ACHIEVEMENTS

ETCPC Certificate (2025): Awarded for volunteering and participation.

ETCPC Honor Award (2024): awarded for placing in the top ranks in Ethiopia's collegiate programming contest.
